Site Security & Surveillance

TOG's integrated and extensive field experience provides **smart**, safe and sophisticated liability and security surveillance solutions for all environments across a multitude of industries. With 24/7 monitoring, asset management and site surveillance for your workforce has never been easier. Customizable and automated alert notifications are communicated through cellular and/or WiFi to any device for those on a need-to-know basis. Having 24/7 control room monitoring allows for authorities to immediately be notified of intruders at any time of day or night, allowing your workforce to safely focus on their tasks at hand. Cloud file-backup provides opportunity to review any suspicious activity or liability concerns.

Surveillance Overview

On-Board Intelligent Monitoring

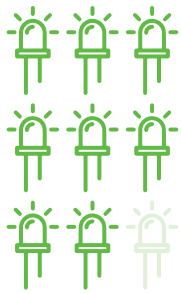

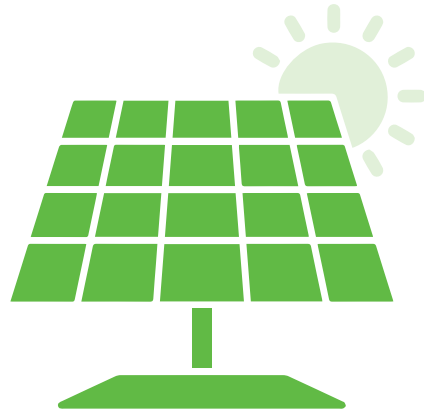

Fixed Camera System on SolarHybrid.li Rental(s)

Powerful LED Lights

Environmental Benefits

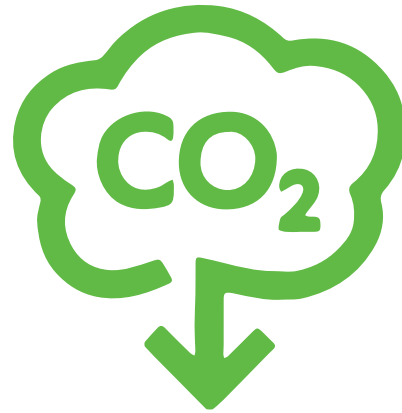

Solar Priority™ feature ensures available solar is battery stored for system use first, well before backup generator is necessary.

**12HRS
LIGHT**
1.5HRS
ENGINE HOURS

12hrs Light = 1.5hrs Engine Hours

12 hours of light requires just 1.5 hours engine runtime (8:1 Solar-to-Engine use ratio*)

Reduced Emissions

Up to **53 Tons CO₂** Annual Reduction

Operational Benefits:

- ✓ **Smart** Monitoring alerts against invisible fence boundary triggers
- ✓ Livestream remote access of unmanned sites and facilities
- ✓ 24/7 Control Room assisted monitoring takes the stress out of surveillance
- ✓ Infrared backup monitoring

**8:1 solar-to-engine use ratio is better than WhiteTail's 7:1 marketing*

Site Security & Surveillance
